NEWS FROM CORAL

Introduction to MOOC topics

The CORAL Start-Up Academy is built of training modules in three EntreComp areas: Ideas and Opportunities, Resources and Into Action. Through video tutorials on the MOOC platform, we will introduce various topics, strategies and techniques across three different levels: B1, B2 and C1. Learners will be able to raise awareness, increase knowledge and upskills.

Third transnational partnership meeting September 2021

Due to the global situation of the pandemic, we are carrying on with online meetings, and the 3rd transnational meeting that should have taken place in UK, was organised online. During this meeting in September, we especially discussed deadlines for finishing all recordings for the MOOC and planning piloting activities.

Multiplier Events (physical if possible + online) should have started in April-May-June because MOOC should be finished prior to ME. All partners agree on moving them to Sept-Oct-Nov.

Online meetings in June and July:

As we have to finalise the MOOC and start working on the test phase with at least 30 participants, all partners participated in these online meetings. We discussed the workload and received brief explanations on the content of the guidelines that will help us finalise this piloting phase.

Start-up Academy MOOC

All partners have been contributing to the development and realisation of the content of the MOOC lessons and an Open Access Start-up Academy MOOC have been hosted on the e-learning website developed by Unitelma. Video-lessons, PPT-presentations, infographics, interactive resources, and other didactic support material have been made available to the participants through the MOOC platform. Each partner has been creating the content of five lectures of one hour in total, in accordance with the guidelines provided in this document.

MEET THE TEAM!
